

# Who's *Really Using Marijuana?*

**Available state data** from medi-pot registrations show that less than 10% of card holders are cancer, HIV/AIDS, or glaucoma patients.

typical *patient*

atypical *patient*

**Well over 90% of registered marijuana users** complain of other ailments including headaches and athlete's foot.

**Many of the users are underage.** For example, in one California city 12% of medi-pot cardholders are younger than 21.
